

SWING TYPE GATE BARRIER

Swaraj Secutech's pedestrian Swing gate model SWJ SG 01/02 is an extremely user-friendly access barrier developed and produced in India for an efficient control of pedestrian movement. The swing barrier is extremely sturdy with transparent Acrylic doors that are 10mm in thickness and noiseless in motion. The strong heart of a DC motor is an option otherwise a 100 % duty cycle enabled DC motor powers the barrier. The inbuilt LED and satin SS finish makes it an architect's delight. Operationally the machine can be interfaced with dry contacts or by RS232, RS485, TCIP(Optional) and can hence integrate into any access control system. The Swing Gate feature incorporates a fail-safe safe solution wherein in case of an emergency or power failure, egress is provided automatically.
